Presentation

We are pleased to present the Canadian Association for Graduate Studies' (CAGS) 36th *Statistical Report*. The report provides data on enrolment and graduation at the Master's and Ph.D. levels from 1992 to 2004. The report was produced from data submitted to Statistics Canada by Canadian universities.

The report is based on Statistics Canada's new Enhanced Student Information System (ESIS), now called the Postsecondary Student Information System (PSIS), for collecting data on the student population. Please, note that the data is automatically rounded out to the nearest unit of 3. This should not be a serious problem, as all the totals were generated by Statistics Canada. Certain corrections were made by the agency to its data base and consequently, some numbers in the report may vary lightly from numbers released in earlier reports. This report includes, for the first time, data from other graduate programs than the Master's and Ph.D. programs.

The tables provide the following information on enrolment between 1992 and 2004:

- Enrolment at the Master's and Ph.D. levels, and in other graduate programs, by university and disciplinary field.
- Women enrolment at the Master's and Ph.D. levels, and in other graduate programs, by university and disciplinary field.
- Non-Canadian enrolment at the Master's and Ph.D. levels, and in other graduate programs, by university and disciplinary field.
- Full-time and part-time enrolment at the Master's and Ph.D. levels, and in other graduate programs, by disciplinary field.

The tables provide the following information on degrees awarded between 1992 and 2004:

- Master's and Ph.D. degrees awarded, by university and disciplinary field.
- Master's and Ph.D. degrees awarded to women, by university and disciplinary field.
- Master's and Ph.D. degrees awarded to international students, by university and disciplinary field. With the exception of the most recent years, discrepancies may be found between the data in this report and the data of earlier reports. These discrepancies are the result of differences in the reporting methods of certain universities. Prudence should therefore be used when making long term comparisons.

The disciplinary fields used in this report are those defined by Statistics Canada in ESIS/PSIS. Likewise, international students for the agency are those students who are neither citizens of Canada, nor landed immigrants in Canada.

We would like to thank Ms. Marie Burton of Statistics Canada for her invaluable cooperation in producing the data for this report. We also want to express our appreciation to Pascal Lemelin and Marie-Claude Laframboise from the *Observatoire* for their help in producing the html version of the report.

Comments or suggestions to improve this report would be most welcome.
